ABSTRACT

This document presents 47 tables showing the Oregon college choices of 1997 Oregon high school graduates. Two summary tables are provided. The first shows 1997 high school graduates admitted in 1997 to Oregon colleges by county of origin and type of college. Of a total of 30,330 graduates, 12,762 enrolled in Oregon colleges; the second summary table, for the years 1986-97, shows Oregon high school graduates admitted by Oregon colleges in the fall of the year following their graduation. Trend data indicate that from 1986 through 1997 a slightly smaller percentage of total graduates attended the Oregon University system, a greater percentage attended community colleges, and the percentage attending independent colleges remained the same. The remaining tables provide details on the number of 1997 Oregon high school graduates enrolled in each of 45 institutions of higher education in Oregon. Provided for each institution is data on the number of incoming freshmen by Oregon county, specific high school, the number of graduates for each high school, and the percent of the high school's graduates admitted to the specific institution. Tables for the institutions of higher education are grouped into those for the Oregon University system, those for state community colleges, and those for independent colleges. (DB)
